Welcome to Concept 1660, a three-bedroom family home that could be the perfect addition to your lot. Offering a spacious, functional, and open-concept layout, quality finishes and fixtures throughout, and the option to adapt the floor plan to suit your needs.

The heart of the home is the open-plan kitchen, family, and breakfast nook area. Here you'll find a large walk-in pantry in the kitchen, as well as quality appliances and an oversized island, and in the expansive family room, you'll have the option of adding a fireplace to keep you cozy during the cooler months.

In the grand master suite, you'll feel a sense of sophisticated stylish thanks to the stunning walk-through master bath that connects to the impressive walk-in closet. Bedrooms two and three are also generous in size, and to serve them there is a modern bathroom.

Extending the tastefully designed layout further is the utility room, large storage closet, and two-car garage that can be extended to a three-car garage, depending on your needs.

Another possibility is to add a covered patio space that will flow from the open-plan living area and is sure to be a wonderful spot to host your guests or enjoy a quiet meal alfresco with family.

With a selection of exterior elevations to choose from to suit your personal style, Concept 1660 is a must-see when considering your next home.
