Sprawling over a single-story, this open-concept floor plan offers generous entertaining spaces while providing quiet retreats for ultimate relaxation.

Choose from eight different front elevations, four with unique optional stone, and intricate brick details. Step inside from the covered front porch and the expansive foyer with boxed ceilings welcomes you to the formal dining room, a joyous space to host dinner parties or enjoy everyday family mealtime. If you are needing a space to work from home, choose to include a private study in lieu of the formal dining room.

Set in the heart of the home, the spacious family room is filled with natural light, welcoming friends and family to enjoy this space. Choose to add warmth to this space by including an optional fireplace.

Open to the family room is the open-concept kitchen. With ample storage and counter space, stainless steel appliances, double door pantry, and central island preparing meals and keeping guests connected is a breeze. The kitchen opens to a sunny breakfast nook with a built-in window seat for additional seating. The breakfast nook also provides direct access to the optional rear covered patio. Choose from two different sizes to suit your outdoor living needs.

The spacious master suite is set back from the family room, providing parents a private retreat at the end of each day. The adjoining master bathroom is complete with dual vanities, a separate walk-in shower with a seat, large corner garden tub, and a huge walk-in closet.

Two additional bedrooms are located toward the front of the home, making them perfect for kids or guests. Both bedrooms have easy access to a full bathroom and the powder room. A flex room is located off the foyer. Use your creativity to turn this space into whatever you need, such as an at home gym or playroom. If not needed, choose to turn this space into a private study, thus keeping the formal dining room. A full-sized utility room and direct access to the two-car garage are located toward the front of the home.
